Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Status of the claims

1. Claim 1 is pending in the instant application. Claim 1 is under examination in the instant office action.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
3. Claim 1 is rejected under 35 U.S.C. 103(a) as being unpatentable over Flaa et al. (1996, WO 96/27661) and Mikura et al. (1985, EP 158487) and further in view of Ahmad et al. (1983, JAOCS, 60, 4, pp.837-840) and Santha et al. (1979, Indian J.Anim.Sci., 49, 1, pp.37-41).

Art Unit: 1646

Claim 1 is directed to a process of a protein storage in an aqueous solution with addition of cysteine as a reducing agent. The process of addition of reducing agents to proteins and lipids for stabilization and storage purposes is known and well described in the art. Flaa et al. (1996, WO 96/27661) teach compositions for stabilizing proteins in aqueous solutions, which contain, among other ingredients, reducing agents (see the abstract and page 11, first paragraph). Flaa et al. (1996, WO 96/27661) did not expressly use cysteine as a reducing agent for the stabilization of proteins but used cysteine derivative NAC (N-acetyl-cysteine) (page 11, first line). Mikura et al. (1985, EP 158487) also teach storage of protein (interleukin-2) compositions, which contains a reducing compound (see the abstract and page 3, fifth paragraph). Mikura et al. (1985, EP 158487) did not expressly disclose cysteine as a reducing compound in particular but mentioned cysteine derivatives, such as N-acetylcysteine and N-acetylhomocysteine (page 3, fifth paragraph). Ahmad et al. describe a method of storage of vegetable oils in aqueous solution with antioxidant amino acids, cysteine among them provided the most activity (see the abstract, Figures 1, 2 and Table II). Also Santha et al. describe the stability of ghee (butter) depends on the presence of amino acids, such as cysteine with antioxidant properties (see the abstract and Table 2). Thus, at the time the invention was made, it would have been obvious to a person of ordinary skill in the art to use cysteine as a reducing agent for the protein storage. One of ordinary skill in the art would have been motivated to do this because, first, cysteine is a well-known reducing agent, which derivatives are widely used as reducing agents, second, can be interchangeably used when a protocol calls for the use of a reducing agent, and, third, is well known to be used for the storage, stabilization and protection of lipid and non-lipid containing compositions.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claim 1 is rejected under the judicially created doctrine of obviousness-type double patenting over claims 1-22 of U. S. Patent No. 6,339,061. Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant claim is generic and encompasses the subject matter of the patent claims in its entirety.

Conclusion

5. No claim is allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Olga N. Chernyshev whose telephone number is (703) 305-1003. The examiner can normally be reached on Monday to Friday 9 AM to 5 PM ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Yvonne Eyler can be reached on (703) 308-6564. The fax phone numbers for the

organization where this application or proceeding is assigned are (703) 308-0294 for regular communications and (703) 308-0294 for After Final communications.

Certain papers related to this application may be submitted to Technology Center 1600 by facsimile transmission. Papers should be faxed to Technology Center 1600 via the PTO Fax center located in Crystal Mall 1 (CM1). The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 C.F.R. § 1.6(d)0. NOTE: If Applicant *does* submit a paper by fax, the original signed copy should be retained by Applicant or Applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED so as to avoid the processing of duplicate papers.

Official papers filed by fax should be directed to (703) 308-4556 or (703) 308-4242. If either of these numbers is out of service, please call the Group receptionist for an alternative number. Faxed draft or informal communications with the examiner should be directed to (703) 308-0294. Official papers should NOT be faxed to (703) 308-0294.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0196.
